

Dear EAA Chapter 856,

Thank you for sponsoring me to go to the 2014 EAA Air Academy in Oshkosh Wisconsin. It was really fun and I learned a ton. I can't wait to use my new found skills to persue my goals for the future. This trip has really helped me expand my knowledge in aviation, and has encouraged me to follow a path in the world of aviation. Thank you for giving me this opportunity and getting me one step closer to my future.

We have done many things here at the Air Academy. We worked in a workshop that included wood working, welding, composite work, sheet metal, and aviation concepts. I hope to use these skills and experiences to help me accomplish my goal of getting to a military academy. While here, we also got to see the Thunderbirds in first class, and that was a great show! The show also consisted of old military planes, acrobatic planes, helicopters, jets, and much much more. I would like to once again thank you for the opportunity to come to the Air Academy. I will never forget this trip!

Sincerely,
Andrew Roxas-Powers
