Dear EAA Chapter 856,

I'm Taylor Begay, one of the participants you have funded to send to the EAA Air Academy in Oshkosh WI. I greatly appreciate that you have given me this wonderful opportunity. The Air Academy in my opinion is a great camp that teaches kids like myself about the world of aviation. I loved it here and it's a great learning atmosphere, the staff and instructors are well trained and wonderful people.

I've learned so much in my week here in Oshkosh, the classes have taught me so much about aviation, that I never knew. I loved having this experience and now with you giving me this opportunity, I will have a greater chance of pursuing my dream of becoming a combat aircraft pilot in the United States Navy. I feel I've learned so much and know more than the average person wanting to succeed the same goal. I also enjoyed having all the hands-on activities in the workshop such as work working, welding and my personal favorite aviation technology. I really enjoyed having a chance to fly a plane and the instructors were very experienced. I never flew an airplane and never realized how easy it was. The camp was a structured, clean environment where the students can interact, and learn things others cannot. So thank you again EAA Chapter 856 for giving me this opportunity.

Sincerely,

Taylor Begay
