

Dear EAA Chapter 856,

I greatly appreciate that you chose me to participate in this year's Air Academy. I had the opportunity to get a ride in a Bell 47 Helicopter, and was able to man the Cessna SkyCatcher. I have been having a good experience and had the chance to build a composite air foil, a wing rib, and a balsa wood glider. The lodge I stayed in was nice and I enjoyed the environment I was surrounded by. I met some cool people while I was here, and made some friends. I got to learn about planes and more planes which was cool.

During my flight in the Cessna, the Certified Flight Instructor that flew with me shared and exhibited two g's, 60 degree banks, and close to zero gravity. I also had the chance to see the old planes in the hangars. I enjoyed doing that and even got to see a closed cabin Waco they had there. Once again thank you for funding me and allowing me to be an active participant in the Air Academy.

Sincerely,
Lillian Roxas-Powers
